

An indicative Setup for taking the Test

The picture below depicts the ideal set up for taking the test:

Make sure your laptop , power bank and mobile are fully charged and you have access to uninterrupted power supply from an inverter etc.

You can use a PC instead of the laptop shown above but make sure it has a web camera and a microphone installed. candidates will need to also have their android mobile / second device handy. The mobile needs to have a working camera / microphone which will be used for viewing the room from the side /back in addition to the Laptop/PC from which the exam will be taken. You need to install **UCanAssess** app from (Link: <https://play.google.com/store/apps/details?id=com.ucanapply.ucanassess>) the Google play store.

In case you do not have a suitable mobile stand for placing the mobile on the side you can make the same using the simple process detected below with only a knife and a normal paper cup :

Step 1 : Paper Cup + Knife

Step 2 : Mark a 1 cm thick slot on the bottom of the cup

Step 3: Cut the slot using the knife

Step 4 : Prop up the mobile in the cut slot and adjust if required
